

Fillmore's Sewer

Part 2

- On July 16th, the Santa Paula City Council voted to fire their consultants and pursue a DBO plant built by **PERC**. They will be saving an estimated \$20 MILLION DOLLARS.
- On that same night, the City of Barstow fired their consultants and hired **Micromedia** to build their sewer plant. They will be saving \$7.5 MILLION IN CONSTRUCTION AND \$1 MILLION A YEAR IN OPERATING AND MAINTENANCE COSTS.
- The City of Fillmore was invited to a July 27th meeting at PERC's office to investigate the opportunity to save our community \$20 million on our sewer plant.

Why didn't staff members go to PERC headquarters immediately to pursue this opportunity to save us \$20 million??
TWO COUNCIL MEMBERS WANTED TO GO!!

We could have this plant for \$27 million!! It could be built above flood plain level and we could save \$4.3 million by not having to build a levee!!

PERC has recently built a larger plant than ours for \$14 million in Tracy, California and a same size plant in Surprise, Arizona for \$11 million.

- They will meet our requirements
- They will meet permit timeline
- They will save us millions of dollars

Don't listen to the excuses! Just ask: **WHY WON'T OUR CITY TRY TO SAVE YOUR MONEY!**
