**“I INSTALL PEACE OF MIND!”**

**BOB NESPECA INSISTS ON USING ONLY FLYGT PUMPS AND MIXERS IN HIS WASTEWATER TREATMENT PLANTS.**

*Bob Nespeca, Vice President, Pacific Environmental Resources Corporation*

Bob Nespeca knows all about wastewater treatment plants. A longtime veteran of New York City's Department of Environmental Protection, he now serves as Vice President of Pacific Environmental Resources Corporation, a fast-growing Design/Build/Operate infrastructure company, based in Southern California. Their mission is to provide southwestern municipalities with the highest quality turnkey solutions in wastewater treatment. "Our clients expect low project cost, high project quality and outstanding long-term performance. That's why we go exclusively with Flygt submersible pumps and mixers. Why Flygt? That's easy. The most important function at a wastewater treatment plant is to keep the water moving. Nobody does it like Flygt." Indeed, according to Mr. Nespeca, they have been running Flygt pumps and mixers at eight different plants (the largest of which boasts a flow of 20 mgd) for over two years – without a single problem. Without a doubt, he takes Flygt. From pumping wastewater to handling all kinds of sludge... to aerating biological waste... to transferring mixed liquor... Flygt has what you need. Find out why top-of-the line professionals in wastewater treatment choose ITT Flygt. Call Mr. Patrick Grella at (203) 380-4700. Or visit our website at [www.flygtus.com](http://www.flygtus.com)
